TAPIZ FINO COLLECTION

Cement Tile

What started over 100 years ago in the South of France as an art form, quickly gained popularity throughout Europe, then transferred to the Middle East and South America thanks to its beautiful satin finish and unmatched durability.

Environment:

We take the same innovative approach to the environment that we do with our products. The Tapiz Fino Collection is made from recycled and sustainable materials.

Manufacturing:

Cement tiles are not fired; there is no glaze layer on the surface of the tile. They derive their durability from the combination of finely dehydrated ground Portland cement layer and a heavier coarse layer of sand and cement.

Product Usage:

Residential | Commercial

Interior: suitable for all indoor floor and wall applications

Exterior: suitable for all outdoor use.

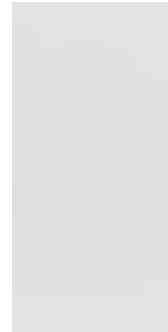

Installation:

Install per industry standards. Always dry lay out material prior to installation to properly blend color. Seal with impregnating sealer of your choice before and after grouting. Periodic cleaning and resealing is recommended.

Maintenance:

Use only nonabrasive/acidic cleaners to avoid etching or scratching.
