DUNE EDITION

ALKUSARI STONE

MORRA[®]

PALMORASTONE

As a way to conserve resources from our quarries and provide longevity to our environment, we have developed an engineered stone that is free of harmful chemicals. An aqueous mixture of crushed natural stone and Portland cement, Palmora is engineered in large block format to allow for versatility and high-volume reproducibility. A pioneer in the industry, Palmora offers unlimited architectural use for interior and exterior purposes.

DUNE EDITION is the first of the **PALMORASTONE** series. Its sand-like composition emulates limestone and volcanic rock while providing more reliability compared to quarried stone.

We take the same innovative approach to preserve the environment that we do to design our products. The DUNE EDITION is made from recycled and sustainable materials.

Like no other. Durable, resilient and exquisitely soft

FINISHES | honed, polished and custom finishes available

ALBIS

NUBILIA

NATURALI

GRISEO

HARENA

CARBO

Features / Benefits

- free of V.O.C's
- free of solvents, carbonation, and efflorescence
- free of alkali-silica reaction
- hypo-allergenic
- UV resistant
- high compressive strength and wear resistance
- slip resistant
- non-flammable

Applications

Commercial | Residential | Interior | Exterior | Floors | Walls | Paving
| Coping | Mosaics | Architectural Elements | Custom Projects

Installation

Install per stone industry standards.

DUNE EDITION can be cut, honed, polished, and carved with stone conventional tools and equipment.

Always dry layout material prior to installation to properly blend color. Seal with impregnating sealer of your choice before and after installation.

Maintenance

Use only nonabrasive / non acidic cleaners to avoid etching and scratching. Periodic cleaning with water and natural soap is recommended.
