Customizable surfaces with distinction and intriguing possibilities

Our unique position as the quarry and factory allows us to apply finishes and custom surfaces across entire slabs of varying thicknesses. We are able to apply classic honed, polished and antiqued finishes as well as contemporary linear, chopped and grooved finishes—resulting in versatile design elements perfect for your interior and exterior projects.

Select from over 15 natural stones from our quarries, or select your own, and match them to a finish applied by our team of experienced artisans. Let marble, limestone and travertine be your canvas of possibilities and contact us for complimentary 4" x 4" samples or to discuss your specific needs.

CUSTOM SLABS

We are the quarry and the factory

Natural raw beauty emanates from every design product and architectural element. Our beautifully designed products only hint at the unique position we occupy within the stone industry. We have the great luxury of being both the source and retailer. There is no middleman. It is our team of professionals working in the quarries, factories and personally reviewing material and finished products. It is our group of designers creating new collections and architectural elements while our artisans hand craft each piece and carve every detail.

The end result is a quality product reflecting our company's greatest strength—our people.
