AORATM

PALMORATM TERRAZZO

As a way to conserve resources from our quarries and provide longevity to our environment, we have developed a new terrazzo that is free of harmful chemicals. An aqueous mixture of crushed natural stone and Portland cement, Palmora Terrazzo is engineered in large-block format to allow for versatility and high-volume reproducibility. A pioneer in the industry, Palmora Terrazzo offers unlimited architectural use for interior and exterior purposes.

DUNE EDITION is comprised of multiple volumes. Each volume is determined by a range of aggregate sizes from sand-like granules to palm-sized stones. This variety offers the flexibility to take on contemporary, classic, or statement designs.

We take the same innovative approach to preserve the environment that we do to design our products. The DUNE EDITION is made from recycled and sustainable materials.

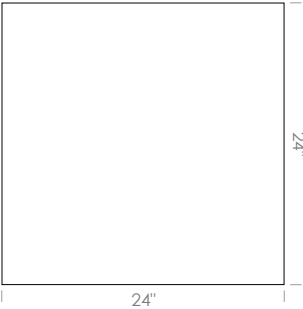

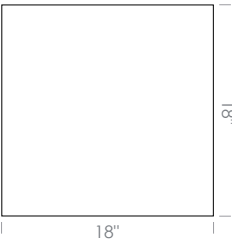

Like no other. Durable, resilient, and exquisitely soft.®

FEATURES / BENEFITS

- free of V.O.C's
- free of solvents, carbonation, and efflorescence
- free of alkali-silica reaction
- hypo-allergenic
- UV resistant
- high compressive strength and wear resistance
- slip resistant
- non-flammable

APPLICATIONS

Commercial | Residential | Interior | Exterior | Floors | Walls | Paving
Coping | Mosaics | Architectural Elements | Custom Projects

INSTALLATION

Install per stone industry standards.

DUNE EDITION can be cut, honed, polished, and carved with stone conventional tools and equipment.

Always dry layout material prior to installation to properly blend color. Seal with impregnating sealer of your choice before and after installation.

MAINTENANCE

Use only nonabrasive / non acidic cleaners to avoid etching and scratching. Periodic cleaning with water and natural soap is recommended.

Special thanks to the team of Alkusari for their dedication and hard work to make Palmora Terrazzo products available to our Earth conscious clients.
